PROFILE

A full stack web developer with a passion for learning, growth, and problem solving. I am always looking for new ways to improve my skills and knowledge, and I am excited to take on challenges. I am also a quick learner and I am able to adapt to new technologies quickly.

PROJECTS

Road Movie Cinephiles [demo](#) | [code](#)

Angular | Angular Material | Heroku | MongoDB | Express | Node | 2023

A full stack web app where users can signup, view movies, add to favourites, and edit their profile.

JavaScript Pokédex App [demo](#) | [code](#)

HTML | CSS | JavaScript | 2023

A web application using HTML, CSS and JavaScript that loads data from an external API and enables the viewing of data points in detail by displaying a list of pokemon as buttons,

Meet App [demo](#) | [code](#)

React | Jest | Enzyme | Axios | Unit Testing | Integration Testing | 2023

A serverless progressive web application (PWA), with React using test-driven development techniques. This application uses the Google Calender API to fetch info about upcoming events.

MyFlix React App [demo](#) | [code](#)

React | MongoDB | Heroku | Express | Node | Netlify | JWT Auth | 2023

This is a React application that allows users to browse and interact with a collection of movies. Users can search for movies, view movie details, add movies to their favourites, and discover similar movies.

MyFlix API [code](#)

MongoDB | Heroku | Express | Node | JWT Auth | Postman | Mongoose | 2023

This is a REST API, which allows registered users to browse movies, add and remove titles from their list of favorites, and update their personal data. The app is built using Node.js, Express.js, MongoDB, and Mongoose.
